CONNECTED HEALTH EXPO DAY 2008

7 MAY 2008
RAMADA HOTEL, BELFAST

An Exciting Opportunity for Healthcare Technology Providers from Europe and the USA to showcase their products to clinicians and senior commissioners

Delegates attending the event will include: senior Government officials, Healthcare Providers and Commissioners, Clinicians, European Telemedicine Centres, Investors, Business Sector and the University Sector.

In January 2008, the Minister for Health in Northern Ireland announced a major £46m investment in the management of chronic diseases over the next 3 years. A major part of this will be for connected health solutions, with a commitment to provide 5000 patients with access to telemonitoring services over the next 3 years. Further details as to how this service is to be procured will be announced at the event.

The Health Minister's announcement has stimulated considerable interest among those working in health and social services, and from the healthcare technology industry. The European Centre for Connected Health, based in Belfast, Northern Ireland is organising this event to raise awareness amongst clinicians and service commissioners, of the benefits that technology can bring to the patient experience.

Exhibition stands (2m x 3m) available at a cost of £500+VAT.

Online registration for exhibitors at www.happen.co.uk/ech
